Roundtable for Reusable Containers Trays and Pallets

16 - 03 - 2022

Roundtable for Reusable Containers Trays and Pallets – The RCTP welcomes Wiitta Oy

Brussels, 16 March 2022 – The Roundtable for Reusable Containers Trays and Pallets (RCTP) is pleased to welcome its newest member Wiitta Oy. The RCTP was founded in 2021 by Schoeller Allibert, Didak Injection, Bekuplast, and UTZ Group, after which BITO-Lagertechnik Bittmann GmbH and Palbox joined the roundtable. The aim of the RCTP is to promote the use of reusable and returnable plastic packaging, resulting in the overall reduction of plastic waste through advocating for a fair regulatory framework for secondary packaging.

Wiitta Oy stands for expertise in the manufacture of plastic components. Since 1972, Wiitta Oy has built up extensive experience in injection moulding and offers product-specific value-added services. Wiitta Oy's goal is to offer high-quality plastic products, including RTPs.

“Joining the RCTP demonstrates Wiitta Oy's vision to contribute to the EU's circular economy and climate targets. Returnable transit packaging systems are the solution to Europe's green transition and responsible use of resources.”

- Wille Viittanen, Managing Director & Owner of Wiitta Oy

“With its newest member, the RCTP can continue playing a role in EU's climate targets. We are pleased to welcome Wiitta Oy and are happy to expand our joint commitment to encouraging the use of reusable, returnable, and recyclable packaging.”

- Ludo Gielen, Chair of the Roundtable for Reusable Containers Trays and Pallets
